The following is an examiner's statement of reasons for allowance: Claims 1 – 20 are allowed.

The composition as claimed are found to be patentable over the prior art because the prior art does not teach or fairly suggest a climaproof cosmetic complex, which comprises (i) 0.1 to 90 % by weight of a gelled oil composition consisting of an oil component and a polymer component, which is a tri- block copolymer, a star polymer, a radial polymer, a multi-block polymer of polystyrene, polyethylene, polyvinyl chloride, polyisoprene, polybutadiene, an ethylene/butadiene copolymer, an ethylene/propylene copolymer, an ethylene/butylene copolymer, an ethylene-propylene/diene copolymer, a styrene- ethylene/propylene copolymer, a styrene-ethylene/butadiene copolymer, a styrene-isoprene copolymer, a styrene-butadiene copolymer, a styrene-ethylene/propylene-styrene copolymer, a styrene-ethylene/butadiene-styrene copolymer, a styrene-isoprene-styrene copolymer, a styrene-butadiene-styrene copolymer, or a mixture thereof; (ii) 0.1 to 80 % by weight of a water-repellent cross-linked polyester having a molecular weight of 600 to 8000 and consisting of polyvalent alcohol and dicarbonic acid monomers; (iii) 0.01 to 20 % by weight of a water-absorbing powder having a particle size of 1 to 100 μ m, which powder is a natural plant powder rich in cellulose, maltodextrine, starch, a starch/polyacrylate copolymer, a synthetic polymer made from an acrylic monomer or mixtures thereof; (iv) 0.01 to 20 % by weight of a thickening agent; and (v) 0.1 to 50 % by weight of an organic solvent, a carrier substance, or a mixture thereof, wherein said cosmetic complex is water resistant and contains essentially no emulsifier.

The closest prior art of record, namely Fowler (US 6391290), teaches skin care compositions that are emulsion formulations comprising an aqueous phase, an oil phase, at least one emulsifier, and an epichlorohydrin cross-linked glyceryl starch and the polyester of (Lexorez 200) (ii) useful as a mascara. While the reference generically embraces a cosmetic with similar components, it does not explicitly teach the specific claimed limitations such as the particle size. The reference fails to teach the cosmetic having gelled oil or containing essentially no emulsifier. Contrarily, Fowler requires an emulsifier (see claim 1). Additionally, the functional limitation climaproof (climate resistant) is not taught by the prior art.

Accordingly, as the prior art does not teach or suggest the composition as claimed, the claims are found to patentable over the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Layla Soroush whose telephone number is (571)272-5008. The examiner can normally be reached on 8:30a.m.-5:00p.m..

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Sreenivasan Padmanabhan can be reached on (571)272-0629. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
